Subject Index of Volume 40

Adhesion
adhesion of microstructures investigated by atomic force microscopy, 71
AlGaAs/Si tandem photodiode
integrated wavelength-division photosensor using GaAs on Si, 121
Ammonia sensor
characteristics of an organic semiconductor polyaniline film as a sensor for NH_3 gas, 159
Anisotropic etching
anisotropic etching of silicon in hydrazine, 227
Arsenic
temperature dependence of an InGaAs–2DEG Hall device with large magnetic sensitivity, 135
Atomic force microscope
adhesion of microstructures investigated by atomic force microscopy, 71

CCD array
pyroelectric infrared image sensors using Si CCD and FET arrays, 111
Ceramic films
Si–Mg–Al–O system ceramic-film humidity sensor, 151
Color-recognition system
integrated selenium color sensor and its application to a color-recognition system, 117
Color sensor
integrated selenium color sensor and its application to a color-recognition system, 117

Edge orientation sensor
a compact line and edge orientation detection sensor, 217
Elastic modulus
PZT–polymer composites fabricated with YAG laser cutter, 187
Elastomer
PZT–polymer composites fabricated with YAG laser cutter, 187
Electromagnetic microrelays
electromagnetic microrelays: concepts and fundamental characteristics, 41

FET array
pyroelectric infrared image sensors using Si CCD and FET arrays, 111
Finite-element method
computation of hydrostatic piezoelectric coefficients for 1–3 composites by the finite-element method, 191
Fire-alarm system
study of fire-alarm system using plural semiconductor and quartz-resonator gas sensors, 155
Fuzzy sensors
from intelligent sensors to fuzzy sensors, 89

Gallium
temperature dependence of an InGaAs–2DEG Hall device with large magnetic sensitivity, 135

Hall device
temperature dependence of an InGaAs–2DEG Hall device with large magnetic sensitivity, 135
Hall elements
micromachined Hall elements for two-dimensional magnetic-field sensing, 141
HF electrolytes
photoassisted electrochemical micromachining of silicon in HF electrolytes, 49
Humidity-sensitive materials
an investigation of sulfonated polysulfone humidity-sensitive materials, 147
Humidity sensors
Si–Mg–Al–O system ceramic-film humidity sensor, 151
Hydrazine
anisotropic etching of silicon in hydrazine, 227

Indium
InSb films for magnetic sensors, 131
temperature dependence of an InGaAs–2DEG Hall device with large magnetic sensitivity, 135
Infrared image sensors
pyroelectric infrared image sensors using Si CCD and FET arrays, 111
Intelligent sensors
from intelligent sensors to fuzzy sensors, 89
IR chopper
characteristics of a liquid crystal IR chopper for pyroelectric IR sensors, 195

Laser cutter
PZT–polymer composites fabricated with YAG laser cutter, 187
LIGA technique
LIGA micropump for gases and liquids, 57
Light-to-light transducer
light-to-light transducers integrated with heterojunction phototransistors and a laser diode, 125
Line orientation sensor
a compact line and edge orientation detection sensor, 217
Liquid crystals
characteristics of a liquid crystal IR chopper for pyroelectric IR sensors, 195

Magnetic-field sensing
micromachined Hall elements for two-dimensional magnetic-field sensing, 141
Magnetic sensors
InSb films for magnetic sensors, 131
Microelectromechanical structures
SCREAM I: a single mask, single-crystal silicon, reactive ion etching process for microelectromechanical structures, 63
Microelectromechanical systems
a fully suspended, movable, single-crystal silicon, deep submicron MOSFET for nanoelectromechanical applications, 77

Micromachining
photoassisted electrochemical micromachining of silicon in HF electrolytes, 49
micromachined Hall elements for two-dimensional magnetic-field sensing, 141
Microphones
improvement of the performance of microphones with a silicon nitride diaphragm and backplate, 179
modelling of silicon condenser microphones, 203
Micropump
LIGA micropump for gases and liquids, 57
Microstructures
slide film damping in laterally driven microstructures, 31
adhesion of microstructures investigated by atomic force microscopy, 71
MOSFET
a fully suspended, movable, single-crystal silicon, deep submicron MOSFET for nanoelectromechanical applications, 77

Optical amplification
light-to-light transducers integrated with heterojunction phototransistors and a laser diode, 125
Optical sensor
an integrated optical position-sensitive detector with digital output and error correction, 237
Optoelectronic integrated device
light-to-light transducers integrated with heterojunction phototransistors and a laser diode, 125
Organic semiconductors
characteristics of an organic semiconductor polyaniline film as a sensor for NH_3 gas, 159

Phototransistors
injection phototransistors, 167
Piezoelectric coefficients
computation of hydrostatic piezoelectric coefficients for 1–3 composites by the finite-element method, 191
Piezoelectric composite
PZT–polymer composites fabricated with YAG laser cutter, 187
Polyaniline
characteristics of an organic semiconductor polyaniline film as a sensor for NH_3 gas, 159
Position-sensitive detector
an integrated optical position-sensitive detector with digital output and error correction, 237
Position-sensitive devices
a compact line and edge orientation detection sensor, 217
Pressure sensors
preparation of polycrystalline SiC films for sensors used at high temperature, 93
Pyroelectric infrared detector
modulation-type pyroelectric infrared detector and its application, 103
Pyroelectric sensors
characteristics of a liquid crystal IR chopper for pyroelectric IR sensors, 195
PZT/polymer composites
computation of hydrostatic piezoelectric coefficients for 1–3 composites by the finite-element method, 191

Quartz
loaded vibrating quartz sensors, 1
Quartz-crystal resonators
reliable frequency–temperature characteristics of the new quartz-crystal resonators vibrating in thickness-shear modes, 97
Quartz-resonator gas sensor
study of fire-alarm system using plural semiconductor and quartz-resonator gas sensors, 155

Radiative transfer
characteristics of heated sensors emitting by radiation only, 173
Reactive ion etching
SCREAM I: a single mask, single-crystal silicon, reactive ion etching process for microelectromechanical structures, 63
Relative intensity noise
light-to-light transducers integrated with heterojunction phototransistors and a laser diode, 125
Resonance
PZT–polymer composites fabricated with YAG laser cutter, 187

Selenium
integrated selenium color sensor and its application to a color-recognition system, 117
Semiconductor gas sensor
study of fire-alarm system using plural semiconductor and quartz-resonator gas sensors, 155
Sensors
loaded vibrating quartz sensors, 1
characteristics of heated sensors emitting by radiation only, 173
Silicon
photoassisted electrochemical micromachining of silicon in HF electrolytes, 49
SCREAM I: a single mask, single-crystal silicon, reactive ion etching process for microelectromechanical structures, 63
a fully suspended, movable, single-crystal silicon, deep submicron MOSFET for nanoelectromechanical applications, 77
pyroelectric infrared image sensors using Si CCD and FET arrays, 111
modelling of silicon condenser microphones, 203
anisotropic etching of silicon in hydrazine, 227
Silicon carbide
preparation of polycrystalline SiC films for sensors used at high temperature, 93
Silicon nitride
improvement of the performance of microphones with a silicon nitride diaphragm and backplate, 179
Slide film damping
slide film damping in laterally driven microstructures, 31
Spectral response
integrated wavelength-division photosensor using GaAs on Si, 121

Sulfonated polysulfone
an investigation of sulfonated polysulfone humidity-sensitive materials, 147

Tin
InSb films for magnetic sensors, 131

Two-dimensional electron gas
temperature dependence of an InGaAs–2DEG Hall device with large magnetic sensitivity, 135

Wavelength sensor
integrated wavelength-division photosensor using GaAs on Si, 121
